

HDRUK
Health Data Research UK

**INDUSTRIAL
STRATEGY**

UK Research
and Innovation

**Uniting the UK's health data to make
discoveries that improve people's lives**

An introduction to Health Data Research UK

4 December 2019

**Our mission is to unite the UK's health data to enable
discoveries that improve people's lives**

Bringing benefits to all

For researchers

Faster, more accurate and less expensive research and development

For clinicians and patients

Identification of new medicines, treatments and technologies

For businesses large and small

To better develop, test and deploy new products, devices, tools and AI technologies in health and care earlier

For society

Creating jobs, generating investment, improving health services

A national Institute for health data science

Launched in April 2018, we work in partnership with the NHS, industry, academia and patients, and by providing safe and secure access to rich health data, we aim to help better understand diseases and discover new ways to prevent, treat and cure them.

We are funded by UK Research and Innovation, the Medical Research Council, the British Heart Foundation, the National Institute for Health Research, the Economic and Social Research Council, the Engineering and Physical Sciences Research Council, Health and Care Research Wales, Health and Social Care Research and Development Division (Public Health Agency, Northern Ireland), Chief Scientist Office of the Scottish Government Health and Social Care Directorates, and the Wellcome Trust.

About Health Data Research UK

Operating Model

- One single national institute
- Federated across the UK
- Ten funders
- Strong Board
- Separate legal entity, tiered structure
- Wellcome Trust base
- Not a data controller
- Partnerships with academia, industry, NHS, charities

We're working in partnership with patients, the NHS, universities, business & charities to create a world-leading and robust health data infrastructure

We're gearing up the UK for quality health care, research and innovation

We're enabling data science and innovation as a catalyst for change

But with big data comes with big responsibilities!

Part of the industrial strategy

Funded as part of the Industrial Strategy Challenge Fund (ISCF) *Data to Early Diagnosis and Precision Medicine Challenge*

Industrial Strategy for Life Sciences (November 2017) Hubs for health data research (*digital innovation hubs*)

Health Data Research UK asked to lead delivery of this programme on behalf of UK Research and Innovation in September 2018

Ensure that the enormous potential value of the UK's health data assets can be realised

Four-year programme launched in September 2018

We've been listening and designing a model that's fit for the future of health data research

INDUSTRIAL STRATEGY

UK Research and Innovation

We've engaged with over
2,700
people

We've spoken to over
350 organisations
in the UK and globally
across NHS, industry
and academia

35

Events

32

Interviews with Businesses

With thanks to

What we heard

The UK has **good health data resources**, but these can be **difficult to identify and access**

Data research and innovation takes place outside of the UK because of the **difficulty in working with UK data**

Members of the public support research using health data, where this is **transparent and leads to benefits to the NHS**

We need to be **clear and concise** on the benefits, risks and how these will be managed

We need to **involve patients and the public** throughout the process

HDRUK
Health Data Research UK

**INDUSTRIAL
STRATEGY**

UK Research
and Innovation

We are delivering what patients expect and what industry, NHS and academic data users want

Data: Longitudinal, event-based, multi-modal, curated datasets on disease sub-groups

Speed: Fast response times and streamlined contracting, governance and approvals

Access: Single, easy-to-use route to data

Expertise: Access to domain specialists, AI and applied analytics, phenotyping

Scale: High quality data with UK-wide coverage

Multiple purposes: Real world data, ability to rapidly identify trial cohorts

All underpinned by building people's confidence and trust in how data is used

Creating a clear strategy for engaging patients and public

**Our Public Advisory Board is one part of our strategy for involving patients and the public
Ensuring that our work is driven by delivering benefits to patients and the public**

**Science – Activating
world-class health data
science**

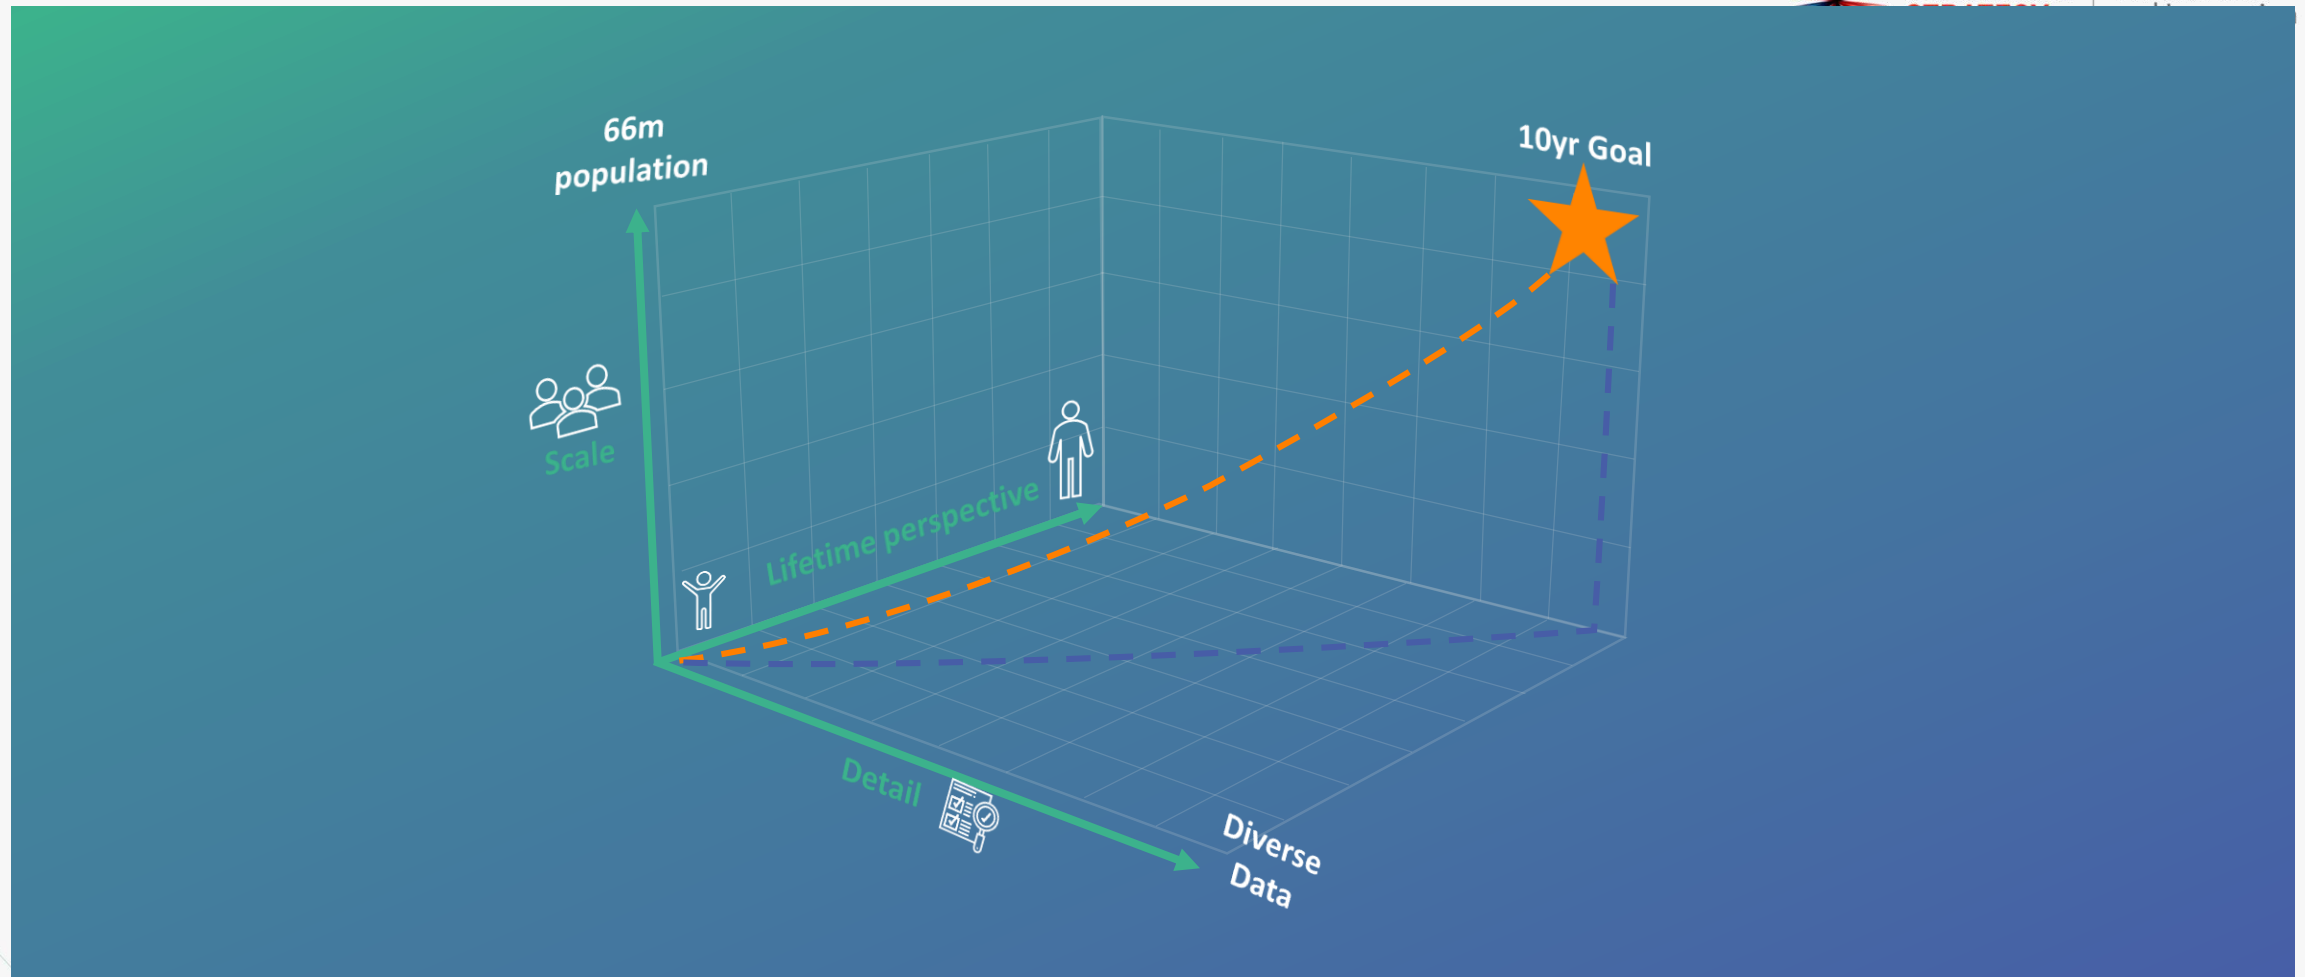

Ambition:

We will develop advanced health data science tools and technologies to analyse complex and diverse health data and seize its power to solve health challenges

Priorities:

- Human Phenome Project
- Applied Analytics
- Understanding the Causes of Disease
- Better, Faster and More Efficient Clinical Trials
- Improving Public Health
- Better Care

Our 10-year ambition for scale

An outstanding partnership

Our initial investment supports six research sites. Each has world-class expertise; a track record in using health data to derive new knowledge, scientific discovery and insight; and works in close partnership with NHS bodies, industry and the public to translate research findings into benefits for patients and populations.

| 1. Wales and Northern Ireland (Swansea and Queen's University Belfast) |
| 2. Midlands (Birmingham, Leicester, Nottingham, Warwick) |
| 3. Scotland (Glasgow, Edinburgh, Dundee, Aberdeen, Strathclyde, St Andrews) |
| 4. London (Imperial, Kings, London School of Hygiene and Tropical Medicine, Queen Mary, UCL) |
| 5. Oxford |
| 6. Cambridge (EBI, Sanger, Cambridge University) |

People – Empowering health data scientists

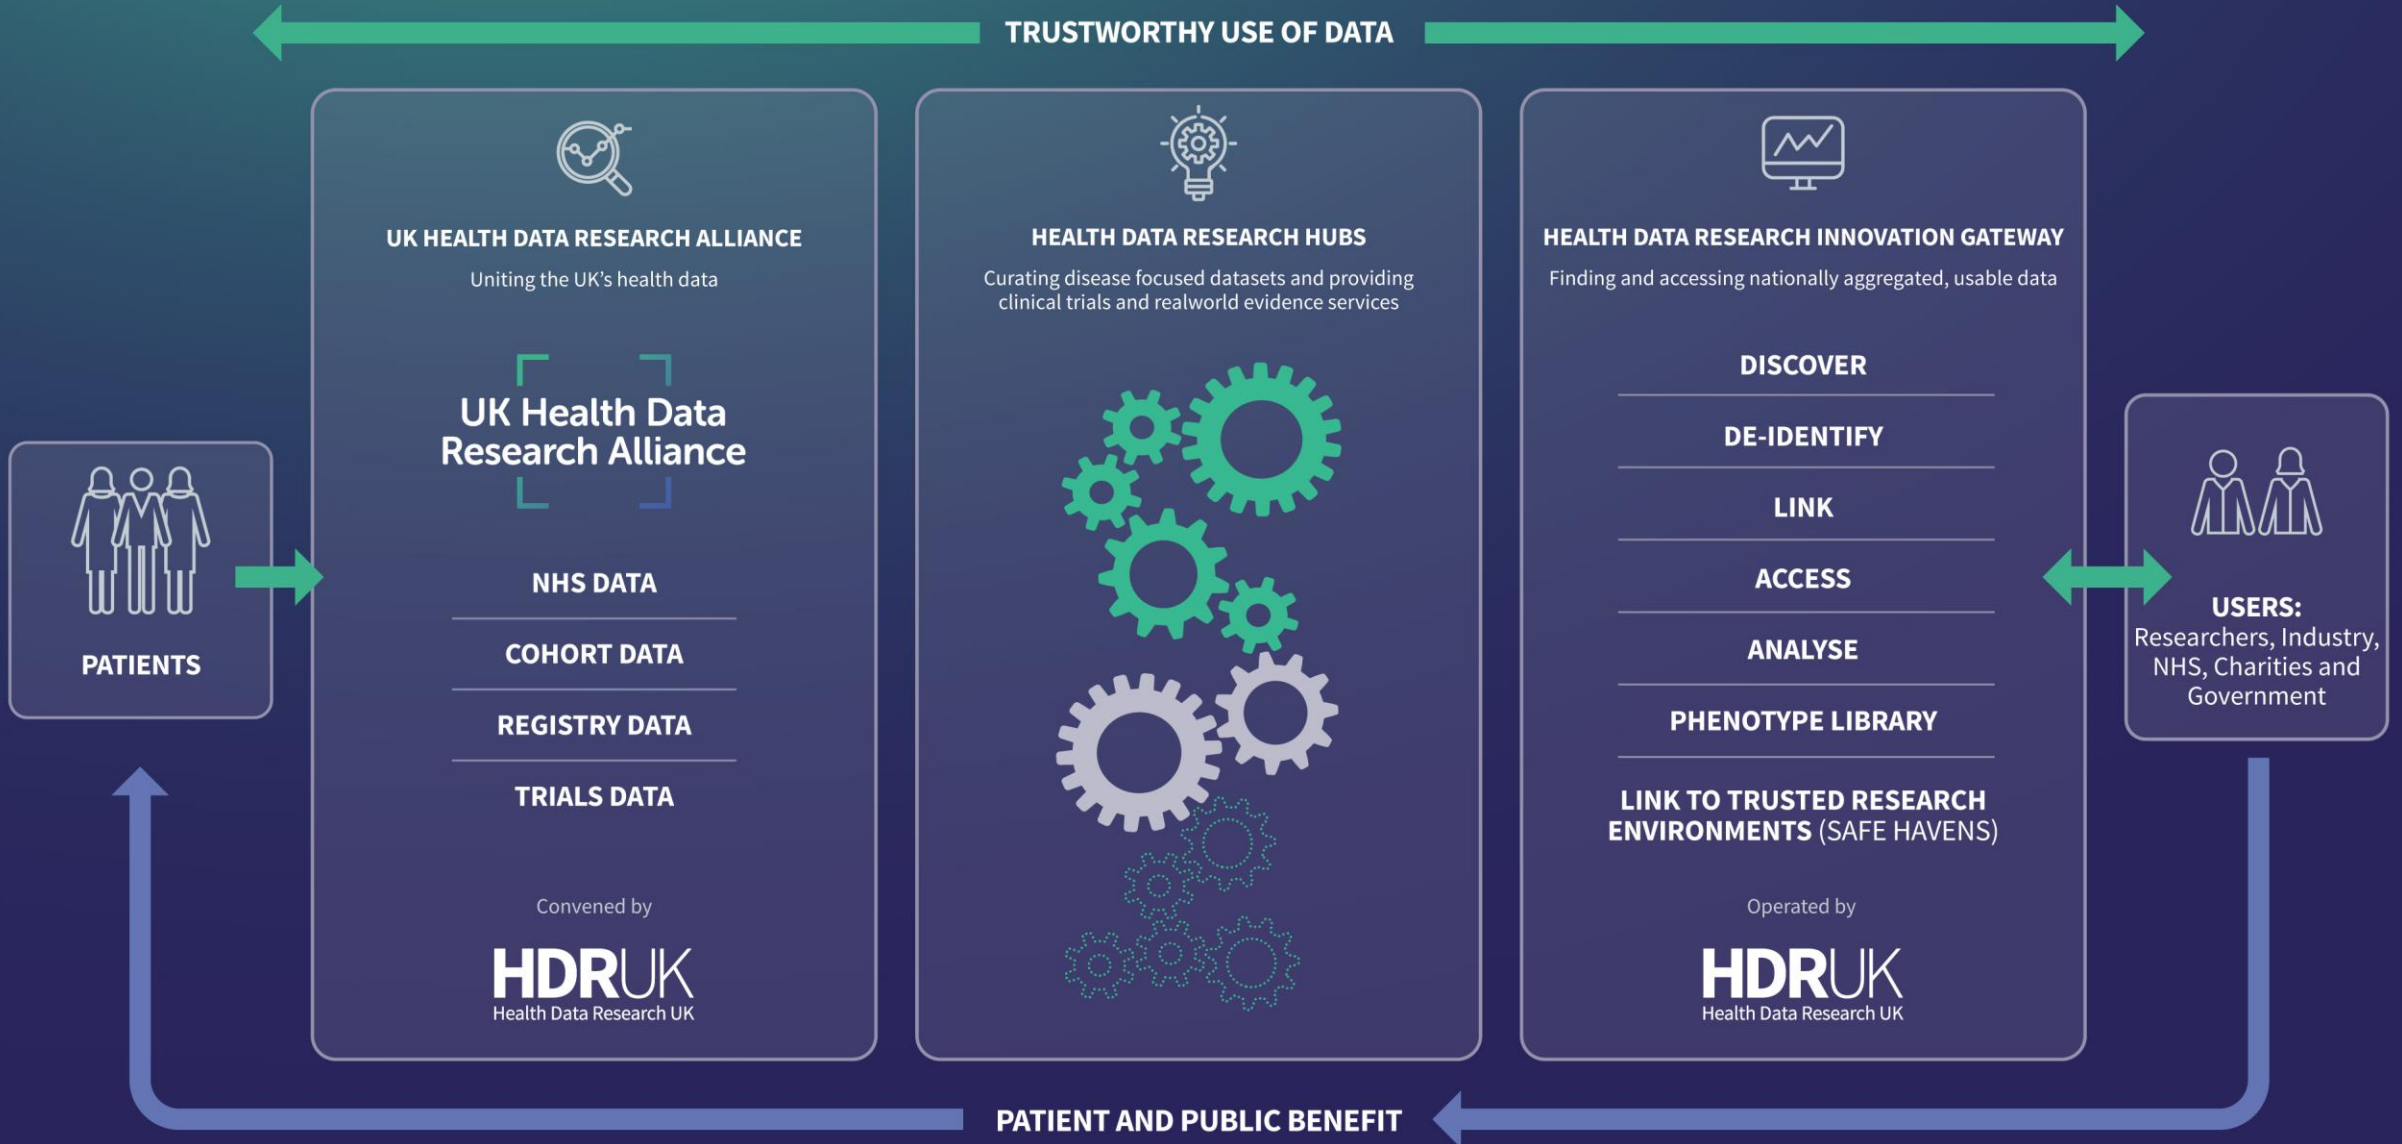

Ambition:

We will create 10,000+ health data scientists spanning all career stages, from school-leaver to senior research manager and international opinion leaders

Priorities:

- School leavers
- Postgraduate
- Post doctoral
- Supporting career pathways

UNITING THE UK'S HEALTH DATA TO MAKE DISCOVERIES THAT IMPROVE PEOPLE'S LIVES

UK Health Data Research Alliance

An alliance of leading healthcare and research organisations united to establish best practice for the ethical use of UK health data for research at scale.

Established in February 2019

18 current members, more expected to join the coming months

<p>National bodies: Genomics England, Health and Social Care Northern Ireland, NHS Digital, NHS England, NHS Scotland, NHS Wales, NHSX, Public Health England</p>	<p>NHS trusts: Barts Health, University Hospitals Birmingham, Nottingham University Hospitals</p>
<p>Members</p>	
<p>Charities: The Brain Tumour Charity, Cystic Fibrosis Trust,</p>	<p>Research Cohorts: Clinical Practice Research Datalink, Healthcare Quality Improvement Partnership (HQIP), NIHR Bioresource, Royal College of General Practitioners Research and Surveillance Centre, UK Biobank</p>

Health Data Research Hubs

The Hubs will focus on curated, disease focused datasets, clinical trials, and real-world evidence. They will involve patients and the public in shaping the research activities and will improve secure and responsible access to data

- Competition launched in May 2019
- Over 160 organisations in 21 consortia applied
- Independent Expert Panel, chaired by Lord Darzi
- 7 Hubs selected

Partnerships spanning across the UK

Health Data Research Innovation Gateway

The Gateway is a common access point to UK health research data for accredited researchers and innovators

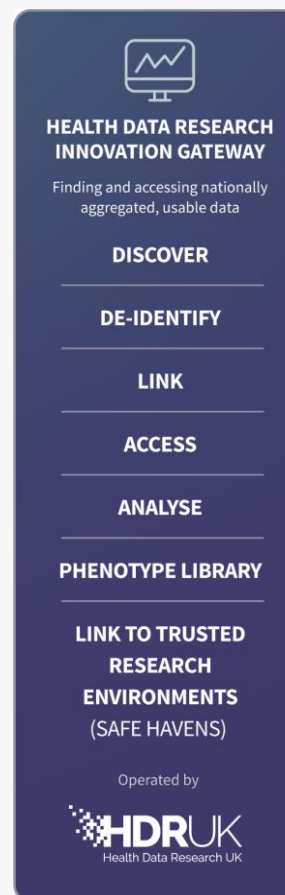

Developed in 2 phases:

Phase 1 (Minimum Viable Product) – Sep 2019 to Jan 2020

- Portal (Discovery and Access) – developed by IBM
- Metadata catalogue – delivered by NHS Digital and University of Oxford

Phase 2 – Mar 2020 to Aug 2022

- Technology Partnership

The diagram shows a vertical flow of steps for the Health Data Research Innovation Gateway. At the top is an icon of a computer monitor with a line graph. Below it is the title 'HEALTH DATA RESEARCH INNOVATION GATEWAY' and a subtitle 'Finding and accessing nationally aggregated, usable data'. The main flow consists of the following steps: DISCOVER, DE-IDENTIFY, LINK, ACCESS, ANALYSE, PHENOTYPE LIBRARY, and LINK TO TRUSTED RESEARCH ENVIRONMENTS (SAFE HAVENS). At the bottom, it says 'Operated by' followed by the HDRUK logo and 'Health Data Research UK'. There are two circular icons with calendar symbols and checkmarks, one next to Phase 1 and one next to Phase 2.
